

# TerraPro™ – the latest addition to the TerraPure® Family

Terracon is committed to offering creative and cost effective solutions to your fluid management challenges. In these challenging economic times, every dollar matters. That is why we have designed TerraPro™, the polypropylene tank ideal for water for injection (WFI) uses and for sanitizing high purity water systems.

When it comes to sanitizing pure water systems, TerraPro™ can take the heat and gives you peace of mind with its translucent design. No need for an external sight glass as you can easily view water levels.

When it comes to WFI applications, you will save time (shorter lead times) and save money with a reliable, lower cost alternative to stainless steel and other materials.

## Save money

- Decrease the cost of your pure water systems by eliminating expensive stainless steel

## Save hassle

- Designed to meet your custom configurations.
- All standard fittings available including sanitary fittings (BPE specs)
- Design simplifies plumbing configurations over existing stainless steel solutions.
- TerraPro™ fits through standard doorways.
- Proven design from a proven fluid management solutions provider.

## Save time

- Provide us your requirements; we will get the tank configured with fast turnaround.
- Work with a partner you can count on that is committed to quality and service.

## Seismic Restraint System

For existing and new fluid management systems, Terracon offers seismic restraint systems as an important accessory for your tank. For our TerraPure® product line, which includes TerraPro™, our seismic restraint systems are available with either baseline or wet stamp calculations depending on your location and local requirements.

## TerraPro™ Tanks with Seismic Restraint Systems

- 125 & 250 gallon capacity
- USP Class VI compliant
- Liquids up to 200° F
- Custom configurations
- All standard fittings available including sanitary fittings in accordance with the requirements of ASME BPE-2009
- Easy to install
- Short lead times
- Multiple stand options including pedestal, powder coated steel or stainless steel
- Insulating blanket available

## Here at Terracon we are problem solvers.

When it comes to challenges related to transferring, mixing or storing fluids we are your one-stop shop for integrated fluid management solutions.

If your requirements include repeatable cleanability, sanitary processing and/or high purity solutions, our team at Terracon can help. The more complex your need, the more we can help design and manufacture a solution that is cost effective and works.

## Primary Industries and Applications:

### Life sciences – proven capabilities meeting FDA, USP Class VI and cGMP standards

- Pharmaceutical manufacturing and research facilities
- Biopharmaceutical research and manufacturing facilities
- Outpatient clinics for hemodialysis

### Water

- Ultra pure water - softening, residential, and purified water for research & light commercial
- Cooling tower/condenser sump/makeup water tanks
- Aquaculture solutions
- Conservation and environmental protection solutions

In addition to the above applications, Terracon has delivered solutions for a broad range of other industries and applications including chemical and beverage applications.

In the field of fluid management, Terracon is a partner you can count on. In business since 1976, we have a proven track record supplying global companies. We respond quickly, stand behind our products and deliver high quality solutions. Contact Terracon Corporation today at [sales@terracon-solutions.com](mailto:sales@terracon-solutions.com) and together let's solve your toughest fluid management challenges.

**Call or e-mail Terracon today for additional information.**

## Terracon's Core Capabilities:

**Innovation & insight** – we creatively and costs effectively solve your fluid management challenges.

**Design expertise** – involve us early in the process to save you time and money. We focus on bringing new products to market to address the toughest challenges in fluid management.

**Engineering know-how** - our team is committed to creative solutions that meet your requirements and exceed expectations.

**Manufacturing** – from prototypes to production we offer full service solutions to get the job done well. We are the leading manufacturer for bringing to market “build to spec” and “build to application” plastic vessels and accessories.

## Terracon's Product Categories and Service Offerings:

- Custom Tanks & Vessels with Fittings
- Rinse Stations for Carboys
- Single Use Applications
- Wide variety of Accessories
- Engineering Services
